🌐 [linkedin](#) | 🐙 [github](#) | 🌐 [Portfolio](#) | [LeetCode](#)

Technical Skills

Frontend: React.js, Next.js, React Native, TypeScript, Redux, HTML5, CSS3

Backend & Database: Node.js, Express.js, PostgreSQL, RESTful APIs

Tools & Testing: Jest, Playwright, Git, Gitlab, Figma, Vite, Webpack, Sentry, Android Studio

Experience

Fullstack Developer

Aug 2023 – Present

Localwell Healthtech Private Limited

Bengaluru, India

- Optimized React application performance by applying code-splitting, Memoization, lazy loading, and virtualized rendering, with Jest-tested critical components and custom hooks; Resulting in 60% lesser rerenders and updates improving performance for 10,000+ active users
- Created reusable React libraries with virtualized tables and optimized rendering, improving and developer productivity across multiple modules.
- Built a performant and SEO optimized marketplace that allowed users to browse medicines, add to their cart and checkout with Cashfree. Loads under 2 seconds and a Lighthouse score of 91. Technologies used: Vite, React, Zustand.
- Improved React Native app startup time by 40% (900ms → 550ms) and FPS from 45 to 60 through loading optimization and component performance tuning
- Reduced native heap size from 250mb to 110mb and optimized memory usage, enhancing app stability on low-end Android devices
- Built OCR system with ML Kit and React Native Vision Camera to extract medicine data from images, improving data entry efficiency.
- Contributed to backend development of subscription and authentication modules, including database schema design and PostgreSQL query optimization.

Frontend Developer Intern

Apr 2023 – Jul 2023

Localwell Healthtech Private Limited

Bengaluru, India

- Collaborated with designers to translate Figma prototypes into production-ready, scalable components following React best practices and company coding standards
- Implemented responsive layouts using modern CSS techniques (Flexbox, Grid) and ensured consistent user experience across devices

Projects

Lexical Text Editor Library | *React, TypeScript, Vite, Lexical* | [npm](#) | [github](#)

- Built a reusable rich-text editor library with support for lists, checkboxes, keyboard shortcuts, formatting tools, and theme customization using Lexical's plugin architecture.
- Designed clean TypeScript APIs allowing developers to extend the editor with custom nodes and plugins, improving integrability and flexibility.
- Published the package on npm with documentation and demo examples, enabling easy adoption across React projects.

Draw & Extrude 3D | *Next.js, WebGL, TypeScript* | [Demo](#) | [github](#)

- Developed an interactive web tool that lets users draw 2D shapes on a canvas and extrude them into real-time 3D models using WebGL rendering.
- Implemented polygon triangulation and geometry generation using earcut/concave algorithms to support complex and concave shapes.

Education

BTECH

2019 – 2023

Tezpur University

Tezpur
