Professional Summary

Full-stack developer with 2+ years of experience delivering scalable web and mobile applications. Proficient in React, React Native, Node.js, Express, and PostgreSQL. Adept at optimizing app performance and building responsive UIs.

Technologies

Frontend: React.js, Next.js, HTML5, CSS3, Vite React Native, Android (basic), PWA

Backend: Node.js, Express.js, PostgreSQL

Programming Languages: JavaScript, Python (basic), Java (basic), C++ (basic)

Experience

Fullstack Developer, Localwell Healthtech Private Limited

Apr 2019 – present

- **Mobile Billing App**

- Optimized navigation and screen rendering to improve performance
- Performed React Native version upgrade (0.72 → 0.77), ensuring seamless integration with Android and iOS build systems and resolving dependency conflicts.
- Built an OCR system using a custom Java ML Kit plugin with React Native Vision Camera to extract data from medicine box images (name, composition, batch, MRP).
- Integrated native modules into React Native, enabling seamless camera and OCR operations.

- **Next.js Website**

- Made custom libraries for the application including tables with list virtualisation and rendering optimisation
- Improved the performance of key modules using React performance optimizations, achieving 40% better load and render speed.
- Efficiently translated Figma designs into scalable, reusable React components with clean, maintainable code.
- Implemented state management using Context API and Redux for consistent application state.
- Built custom hooks to encapsulate logic and promote code reuse across components.

- **Backend**

- Was actively involved in the development and maintenance of the backend of the subscription and authentication module of the application
- Designed database schema and optimized PostgreSQL queries.

- **Vite + React E-commerce Frontend**

- Built an SEO-friendly, SSR-ready e-commerce frontend from scratch using Vite + React.
- Built a cross-platform React PWA with responsive design, enabling users to access the app via browser or as an installable mobile app
- Enabled app-store-ready PWA bundling via Bubblewrap Package.
